

Dietary Supplement Products Containing DMAA

OPSS maintains a list of currently available commercial products that list DMAA on their product label or website (by any of the synonymous names listed below). We have made reasonable effort to identify as many products as possible, but the list likely does not include all such products. In 2013, FDA announced that “Dietary supplements containing DMAA are illegal...” Subsequently, many products were either discontinued or reformulated, but there are still both old and new products available that include DMAA as an ingredient.

Many products have disappeared from the market, but some retailers still have stock of discontinued or reformulated products that contain DMAA. Many non-DMAA versions now exist that have the same or a similar product name. So it is important to read ingredient labels carefully before using any product, especially those promoted for pre-workout and weight loss. (Note: The list of “discontinued” products once included in this document has now been omitted; most such

products have been unavailable for more than 2 years.)

Many manufacturers clearly identify the “geranium extract” or “geranium oil extract” in their products as DMAA or one of its other names. For those that do not, we have no way to determine whether the “geranium (oil) extract” identified on the label is a different—possibly natural—product (that is, not DMAA) or some form of synthetic DMAA. The only way to determine positively if a product does or does not contain DMAA is through laboratory testing, so OPSS recommends using only dietary supplements that have evidence of third-party testing by a reputable independent laboratory.

In order to check labels, you need to know the numerous terms and synonyms for DMAA. Below is a list of various terms that could appear on a Supplement Facts label of a product containing DMAA. The most common ones are in boldface.

- **1,3-dimethylamylamine**
- 1,3 dimethylamine (misspelling)
- 1,3-dimethylpentylamine
- **2-amino-4-methylhexane**
- 2-hexanamine,4-methyl-(9CI)
- 4-methyl-2-hexanamine
- 4-methyl-2-hexylamine
- 4-methylhexan-2-amine (IUPAC)
- C7H17N (chemical formula)
- CAS 105-41-9
- Crane’s bill extract 200:1 (misnomer; not necessarily DMAA)
- **Dimethylamylamine (DMAA)**
- **Dimethylpentylamine (DMP)**
- **DMAA**
- Floradrene
- Forthan
- Forthane
- Fouramin
- **Geranamine (Proviant™)**
- GeranaX
- Geranium extract
- Geranium flower extract
- Geranium oil
- Geranium oil extract
- Geranium stems and leaves
- Metexaminum
- Methexaminum
- **Methylhexanamine (MHA)**
- Methylhexaneamine (MHA)
- Pelargonium (various)
- Pentylamine
- Synthetic geranium

Note: OPSS updates this list approximately every year, so please check back for the latest version.
